

Netflix Content Analysis

Using **SQL** and **Microsoft Power BI** to transform raw streaming data into meaningful business insights

Project Objectives

01

Clean & Prepare

Preprocess the dataset using SQL

03

Visualize

Build an interactive Power BI dashboard

02

Analyze

Write SQL queries for business analysis

04

Insight

Generate actionable business insights

Dataset Overview

An illustration of a hand holding a pen, writing in a spiral-bound notebook. The notebook is open to a page with a grid pattern, resembling a spreadsheet. The grid contains various numbers and text, including names like 'ROGERS', 'LEVIN', and 'FINCH ETV'. The hand is positioned over the bottom right corner of the grid, writing in one of the cells. The background is a warm, orange-toned wooden surface.

NETFLIX TITLES DATASET — KAGGLE

~8,800

Total Records

12

Columns

Fields: title, type, director, cast, country, release year, rating, duration, genres, description

Tools & Technologies

MySQL

Data storage & cleaning

SQL

Data analysis & querying

Power BI

Interactive dashboard creation

DAX

KPI measures & calculations

Excel

Dataset management

Methodology

A structured workflow transforming raw Netflix data into interactive visual insights.

SQL Analysis Queries

Content Counts

Total titles, movies & TV shows

Top 10 Countries

Content contribution by country

Top Genres & Directors

Most common genres and directors

Ratings & Release Years

Rating distribution and year trends

Power BI Dashboard

KPI Cards

Titles, Movies, TV Shows,
Countries, Directors, Latest Year

Charts

Donut, Line, Bar & Column charts

Slicers

Filter by Type, Country, Rating & Year

Key Insights

Movies Dominate

Movies account for the majority of Netflix content

US Leads

The United States contributes the highest number of titles

Top Genres

Drama & International Movies are the most common genres

TV-MA Rating

TV-MA is one of the most frequently assigned content ratings

Content Growth Over Time

Significant Growth After 2015

Netflix's content library expanded rapidly, with a steep rise in titles added each year — reflecting aggressive global content investment.

- ❏ Interactive dashboard allows filtering by country, rating, type, and release year for deeper analysis.

Conclusion & Future Scope

Conclusion

SQL + Power BI successfully transformed raw Netflix data into actionable insights on content type, genre, country, and ratings.

Future Scope

- Integrate IMDb ratings
- Build ML predictive models
- Connect to live streaming data
- Advanced recommendation analytics
- Publish via Power BI Service
